NOTIFICATION PLAN

Below, or on an attached sheet, describe methods or combinations of methods to be used (door-to-door, phone, etc.) For each section of your plan, give an estimate of the time required, necessary personnel estimated coverage, etc. Consideration must be given to non-English speaking groups, persons not home during the day, and outlying water users.

Please describe your water system's plan for emergency notification to all water users:

Notification of water users will be by door-to-door delivery of copies of the DHS approved notification. The notification will be in English and Spanish. The City will maintain a list of who receives a notification in Spanish. All other customers will receive the notification in English. The notifications will be delivered by City Staff and volunteers. The City staff include the Public Works Department, the Administrative staff at City Hall, and City Council. The volunteers include the Volunteer Fire Department and appropriate citizens. The City Staff will be notified to assist in an emergency by paging and calling their homes. City Staff will then contact the volunteers for assistance. Depending on the available staff, it will take from 3 to 8 hours to deliver all of the notices. The City also has the ability to broadcast the notification from the speakers on their fire truck while driving down each street in town.
